

Accomplishment

In this assignment, we created both a storyboard and paper prototype for our project.

Deliverables

- Storyboards for the three scenarios of the functionality we selected for our design.
- At least two screenshots of our paper prototype.
- A 1-3 minute video of our paper prototype in action.
- A usability testing plan as following:
 - What are our metrics for success
 - What data we plan to collect when we test
 - What strategy or strategies to use to collect data (A specific survey, interview, etc.)
 - Where to perform our experiment
 - Any additional equipment (eye tracking software, microphones, software, etc.)
- A discussion and analysis of our prototype as following:
 - A brief paragraph description of our product.
 - Any design metaphors used (or planned on using if not shown).
 - A user analysis
 - What 1-3 things we think our product does well.
 - What 1-3 things we think we can improve upon after testing our prototype.
