

Accomplishment

For this task, we setup a study for which we are going to test the paper prototype of our product.

Deliverables

- Preliminary script read to subjects
- Blank consent form
- Observational worksheets with record of user actions and observations.
- Links to videos of subjects performing the tasks.
- Post-study surveys administered to subjects.
- A writeup summarizing our experience running this study, including what went well and what we feel could use improvements for the next version of this study.
