Accomplishment

This assignment consists of several parts, including completing the Social and Behavioral Research course, creating a preliminary usability test plan for our prototype, and piloting the test on members of our team to identify any issues.

Deliverables

- Behavioral Research Certificate
- Preliminary sUsability Test Plan (including supporting documents)
    - the scope and purpose of the tests
    - the performance objectives to be tested
    - what kind and how may participants
    - what scenarios to test
    - specific tests and documentation
    - equipment and physical conditions
    - staff roles during test
    - test data collected and data protections
    - qualitative and quantitative test metrics
    - how the test metrics will be analyzed
- Pilot study report and reflection
    - The testing session
    - What went well with the session
    - What did not go well or what was unexpected with the session
    - What revisions made to the usability test plan based on our pilot session
